

Requirements Document: Donor Engagement Chatbot

Project Name

Food Relief Donor Assistant

Version: 1.0

Stakeholders: Development Team, Marketing Director, Donor Relations Manager

1. Project Objectives

The chatbot should:

- **Automate responses** to frequently asked donor questions.
- **Increase conversion rates** for both one-time and recurring donations.
- **Provide transparency** regarding organizational impact and food distribution efforts in real time.

2. Functional Requirements

2.1 Donation Management

Direct Donation Linking

The chatbot must provide direct links to donation pages for:

- Individual Donations
- Corporate Sponsorships
- Monthly Giving Programs

In-Chat Pledging

The chatbot should:

- Capture donor intent for high-value contributions

- Collect contact information for pledges of **\$1,000+**
- Route pledge details to donor relations staff

Secure Payment Hand-Off

The chatbot must:

- Redirect users securely to payment processors such as **Stripe** or **PayPal**
- Avoid storing financial or payment information within chat logs

2.2 Impact & Information

Inventory Needs

Provide a real-time list of:

- Most-needed food items
- Current donation shortages
- Seasonal supply requests

Tax Compliance

The chatbot must automatically provide:

- Organization EIN
- Instructions for obtaining tax receipts
- Donation acknowledgment guidance

2.3 User Interaction

NLP Intent Recognition

The chatbot should recognize and respond to inquiries related to:

- Volunteering
- Tax Receipts
- Drop-Off Locations
- Partnerships

Lead Capture

The chatbot should collect:

- Name

- Email Address

For users who:

- Request follow-up communication
- Subscribe to newsletters
- Express partnership or sponsorship interest

Human Escalation

The system must support:

- Manual hand-off to live staff members
- Escalation when:
 - A user requests a human representative
 - The chatbot fails to answer correctly after **two attempts**

3. Data & Content Requirements

FAQ Database

The knowledge base should include:

- Pantry hours
- Service areas
- Dietary restriction policies
- Common donor questions

Impact Data

Dynamic monthly updates should include:

- Total meals served
- Number of families helped
- Distribution statistics

Location Services

Integrate with **Google Maps** to provide:

- Food pantry locations
- Donation drop-off pins

- Navigation assistance

4. Technical & Non-Functional Requirements

Security

The platform must ensure:

- Encryption of all PII (Personally Identifiable Information)
- Data protection both **in transit** and **at rest**

Compatibility

The chatbot must function across:

- Mobile browsers
- Desktop browsers
- CMS platforms such as:
 - WordPress
 - Squarespace

Accessibility

The chatbot must comply with:

- **WCAG 2.1 AA** accessibility standards
- Visual impairment accessibility requirements

Tone & Communication Style

The chatbot should maintain a tone that is:

- Professional
- Empathetic
- Transparent

5. Success Metrics (KPIs)

Conversion Rate

Measure the percentage of users who click “**Donate**” after interacting with the chatbot.

Deflection Rate

Track the percentage of FAQ inquiries resolved without staff intervention.

User Satisfaction

Monitor average ratings collected through post-chat surveys.
