

HealthE Go-To-Market Strategy

Deloitte Case Competition – April 2026

Team: Nadheer Nilamutheen | Udaya Raja | Vivian Glenn |

Client: HealthE

HealthE Adoption Gap vs. Telehealth Market Opportunity

The HealthE Challenge

Awareness

Low brand recognition in target communities

Trust

Skepticism toward virtual care quality

Access

Connectivity, device, and digital literacy gaps

Retention

Patients revert to in-person care

Market Opportunity

Rapid Telehealth Expansion

Digital-first care adoption accelerating, regulatory flexibility expanding access

Unmet Healthcare Demand

Underserved communities lack consistent care access

Growing Care Needs

Primary care, mental health, chronic disease management

Implication: Addressing these four barriers is critical to unlocking HealthE's telehealth market opportunity.

Key Barriers to Adoption

Trust Barriers

- Skepticism in virtual care quality
- Privacy and data security concerns

Access Barriers

- Limited internet & device access
- Low digital literacy

Awareness Barriers

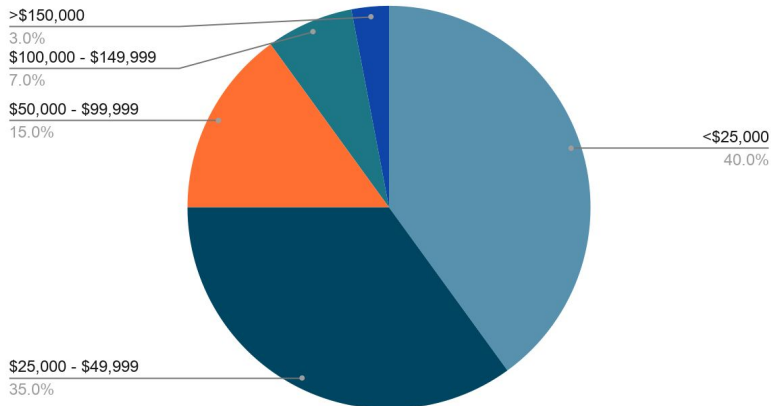

- Low brand recognition
- Limited telehealth awareness

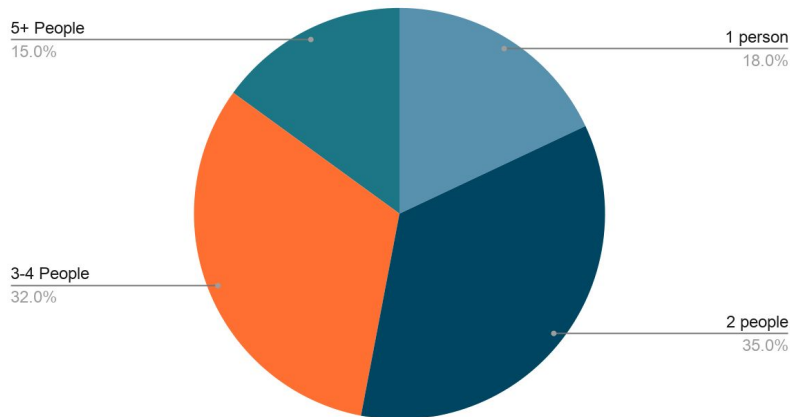

Behavioral Barriers

- Preference for in-person care
- Resistance to behaviour change

Household Income

Household Size

Current User Demographics

70%

Rural Users

Current user base primarily
serves rural communities

42%

Low Annual Spend

Households spending
<\$500/year on healthcare

2.5x

Projected Growth

Expected user base expansion
over 3 years

Target Segments & High-Frequency Care Populations

Target Segments

Rural populations

Underserved communities with limited local access.

Families

Bundled care plans support ongoing household needs.

Elderly users

Benefit from guided, community-based access points.

High-Frequency Users

Chronic patients

Need consistent, ongoing care.

Mental health seekers

Require recurring support and follow-up care.

Caregivers

Coordinate care and drive repeat usage.

These segments combine unmet need with repeat usage, supporting adoption and retention.

Accelerating Telehealth Adoption Through Community Networks

Community Partnerships

- Community health centers
- Pharmacies
- Churches & nonprofits

Group Enrollment

- Schools
- Local employers
- Community groups

Provider Referrals

- Primary care providers
- Clinics
- Specialists

Strategic Outcomes

- **Build trust** through familiar, local channels
- **Reduce barriers** to telehealth access
- **Accelerate early adoption** among target populations

Access Solutions: Removing Barriers to Telehealth

Key Results: Higher adoption → Reduced access barriers → Increased trust

Expanding Telehealth in Suburban Markets

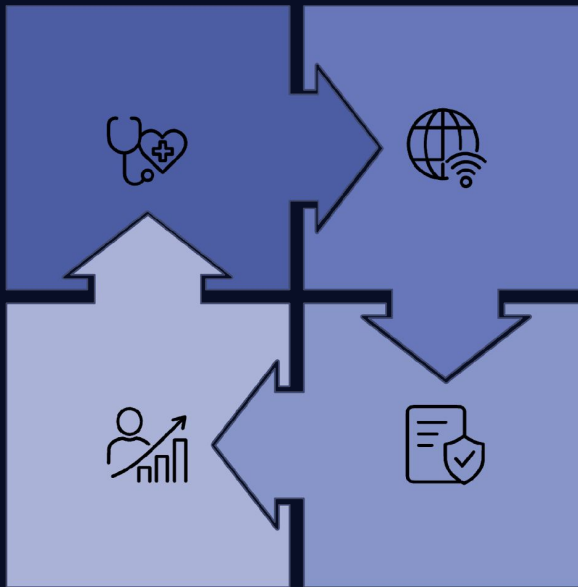

Leverage digital connectivity, partnerships, and local providers to accelerate adoption

Convenient Services

Urgent care • Primary care •
Mental health

Adoption & Scale

Reminders and family support

Digital Acquisition

Search marketing • online
sign-ups

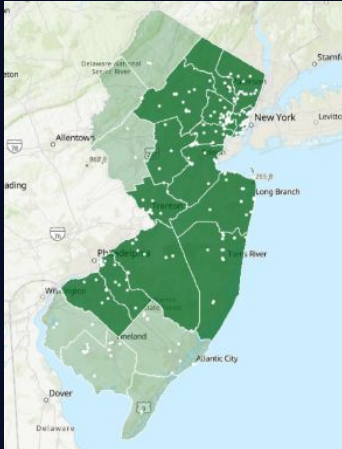

Employer & Insurance Partnerships

Employer health programs •
insurance networks

Example Market Analysis: New Jersey

Service Access

Hospital distribution
across New Jersey

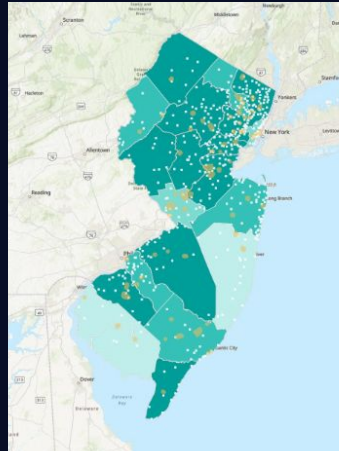

Density (people / sq. mi.)

- Hospitals
- Rural (≤ 500)
- Suburban (> 500)

Digital Connectivity

Broadband access and digitally
connected communities

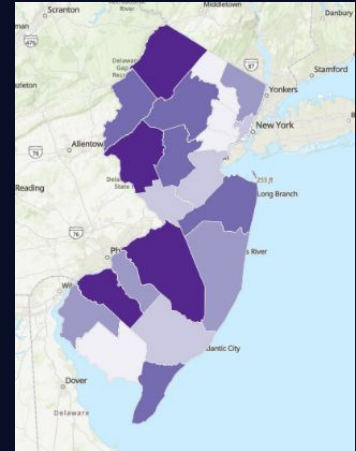

Broadband Internet Access (%)

- Libraries
- Colleges/Unis.
- 95.1+ - 96.9
- 93.0+ - 95.1
- 91.4+ - 93.0
- 91.0 - 91.4

Partnership Potential

Counties with higher
insured populations

Insurance By County (%)

- 93.7+ - 95.1
- 92.3+ - 93.7
- 89.4+ - 92.3
- 85.5+ - 89.4
- 84.3 - 85.5

Win in urban markets through hybrid care networks and targeted programs

Generic Telehealth	Community-based care providers	HealthE (Differentiated Model)
Standalone virtual visits	In-person clinics	Hybrid care network
Fast access but low personalization	High trust but limited capacity	Telehealth + local partners
Broad services	Basic primary care	Targeted care pathways

High-Frequency Care Programs

Chronic Disease
Management

Behavioral Healthcare

Substance Use Disorder
Treatment

Caregiver Support

- ✓ HealthE combines the scale of telehealth with trusted community access, enabling stronger adoption in urban markets.

Engagement & Retention Strategy

Personalized Experience
Tailored care plans, smart reminders,
and family dashboards

Habit Formation
Monthly check-ins, subscriptions,
and chronic care programs

Always-On Value
Fast access, easy rebooking, and
integrated care

Community Trust Loop
Local partners and kiosks

Outcomes: Higher Retention → Stronger Trust → Increased Lifetime Value

KPIs to Drive Adoption & Growth

1

Awareness

- Website traffic
- Brand search volume
- Community referral uptake

2

Adoption

- New sign-ups
- Conversion from outreach programs
- Family plan enrollment

3

Engagement

- Average visits per member
- Retention after first 3 months
- Participation in chronic care programs

4

Financial

- CAC vs. LTV ratios
- Subscription revenue growth
- Revenue per user and cohort analysis

Projected Impact

1

Targeting Underserved Communities

Strategic partnerships and kiosks expected to increase adoption by 20–25% in year 1

2

Family Plans & Affordability

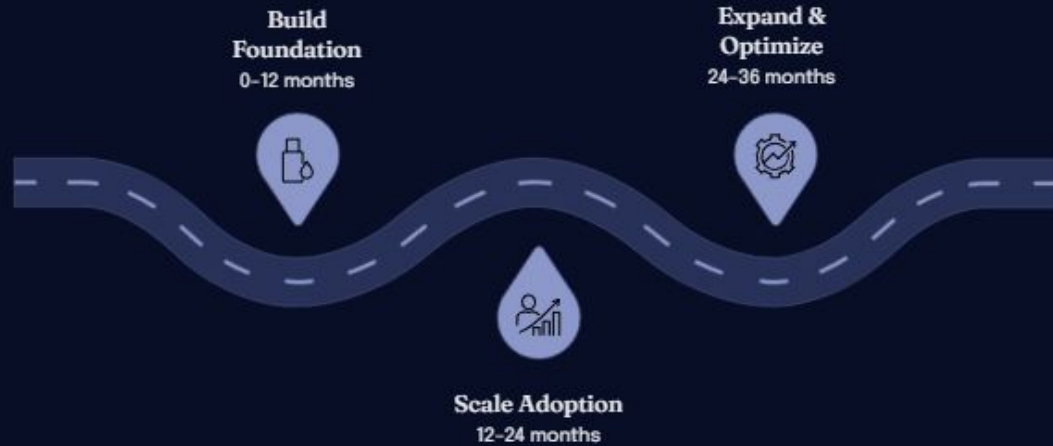

Adjusted pricing could expand household penetration by 15–20%

3

Scalability

Projected 2–3x user base growth over 3 years

Implementation Roadmap

Phase 1: Build Foundation

0-12 Months

- Pilot telehealth kiosks in 5 rural communities
- Form key local partnerships
- Build an MVP with community feedback

Phase 2: Scale Adoption

12-24 Months

- Expand to 20+ communities
- Launch employer and insurance partnerships
- Improve accessibility and retention

Phase 3: Expand & Optimize

24-36 Months

- Enter urban markets
- Add AI-driven personalization
- Track performance and optimize
